WORK EXPERIENCE:

Juno College of Technology *June 2019 – July 2020 | Web Developer*

Role and Responsibilities:

- Mentor and code reviewer for Juno College Web Development Course.
- Help Students trouble shoot code bugs and issues with their projects.

PROJECTS:

Pictogram **| MERN Stack | Context API | Express | Material UI**

A full-stack social media application similar to Instagram.
- Signup with username, email & password
- Create posts, upload pictures and like/ comment on posts
- Follow/ unfollow other users
- Add/ edit user profile picture, website and bio

Emaily **| MERN Stack | Redux Form | Passport | OAuth | Express**

A feedback collection application to be marketed to startup owners/ product owners/ product managers so that they can collect feedback for their users.

- User signs up/ signs in via Google OAuth
- User pays for email credits via Stripe
- User creates a new 'campaign' or 'survey'
- App sends emails to a list of surveyees
- A report of tabulated feedback is provided to the user

The Movie Buff **| React Hooks | Router | Rest API | Sass | HTML5 | CSS3**

A movie nomination app that allows users to search and nominate their top 5 movies.
- Search movies from TMDb api
- Select and nominate favourite 5 movies
- Change/ remove movies from the cart

WORK EXPERIENCE:

ShoppersChoice | MERN Stack | React Hooks | Redux | ReactStrap

A fully functional full-stack e-commerce application with shopping cart checkout system.

- Signup/ signin user, 2-level user authentication- admin, other users
- User can search/ filter products
- Product review/ rating system for the products
- Payments with Paypal API or credit/debit card

Create Party App | React | Router | Firebase | Rest API | Pair Programming

The App allows users to create parties for guests with dietary restrictions.
- An agency-style React app built in collaboration with 3 other developers.
- Involved close collaboration with all module owners in development and integration phase of the project.
- Gets recipe suggestions from Spoonacular API.
- Firebase for storing user profiles and parties.
